【Inquiry Learning | 探究学习】

I SA Tianhe Year 1 Explores the World 爱莎天河师说特辑 | 推开世界的窗：Y1 探究之旅

Our Year 1 students embarked on an exciting journey of exploration at the Windows of the World park in Shenzhen, marking the beginning of their new Unit of Inquiry (UOI), ‘Where We Are in Place and Time’. The Central Idea of this UOI, “Exploration leads to discoveries, opportunities, and new understandings” came to life as students observed, questioned, and engaged with miniature landmarks from across the globe.

一年级学生在深圳世界之窗开展了一场有趣的户外探究学习，以此为起点，展开了新一单元探究课程 (UOI) “我们身处什么时空”的新单元探索。本单元的中心思想——“探索引领新发现、机遇与新认知”，随着学生们对全球微缩景观的观察、提问与互动，变得生动而鲜活。

ISA Tianhe | From Flat Sheets to 3D Marvels 爱莎天河 | 从平面到立体的创造之旅

Serving pupils across Year 1 to Year 5, the ISA Tianhe STEAM Lab hosts each class for a weekly session during their timetabled UOI/STEAM time, accompanied by their class teacher. Our approach involves embedding the STEAM curriculum within the pupils' current Unit of Inquiry, which serves to solidify classroom learning through hands-on project work.

爱莎天河学校 STEAM 实验室面向一至五年级的学生开放。每个班级在班主任的带领下，在探究单元或者 STEAM 课程时间前往实验室进行实践探究。在课程中，我们将 STEAM 教学内容融入学生当前进行的“探究单元”，从而通过实践项目巩固他们在课堂上学到的知识。

ISA Tianhe | Sustainable Communities 爱莎天河 Y3 UOI 可持续社区 | 绿色社区，未来同行

In Y3's third Unit of Inquiry, titled "Sharing the Planet," students engaged with the central idea: "People can make choices to support the sustainability of the Earth's resources." This exploration has provided them with a comprehensive understanding of sustainability and motivated them to consider how their choices impact the planet.

在三年级第三单元“共享地球”的探究学习中，同学们围绕“人类可通过自身选择，守护地球资源的可持续发展”这一核心思想展开学习。这段探索不仅帮助他们深刻理解了可持续发展的意义，更引导大家反思：我们的每一个选择，都在影响着地球的未来。

ISA Tianhe Toy Factory Visit | Explore the Wonder of Making 爱莎天河玩具工厂之旅 | 探索智造奥秘

Student representatives from Y2 of ISA Tianhe visited a toy factory in Foshan. This visit provided an enriching experience in collaboration with a manufacturing business in Guangzhou, perfectly aligning with our Unit of Inquiry: How We Express Ourselves. After the visit, the students shared their experiences and insights with their classmates.

爱莎天河二年级的学生代表们前往佛山参观了一家玩具工厂。本次参观是学校与广州一家制造企业合作开展的研学实践活动，内容充实、意义丰富，与我们的探究单元“我们如何表达自己”高度契合。参观结束后，同学们还在班级里分享了自己的参观经历和感悟。

II SA Tianhe A Journey Through Time: From Ancient Egypt to Today 爱莎天河穿越时空的旅程：从古埃及到今天

In Year 2' s history unit, students have been developing their research skills as emerging historians, investigating the central idea that events in the past are closely connected to the present. Through structured inquiry and the analysis of historical sources, they have explored the civilisation of ancient Egypt. This study has enabled them to examine how the achievements and practices of this early society have influenced aspects of the

modern world, fostering both historical understanding and critical research skills.

在二年级的历史单元中，学生们以小小历史学家的身份不断提升调研能力，围绕中心思想“过去发生的一切，都与今天紧密相连”展开一系列探究活动。通过结构化探究与史料分析，他们学习了古埃及文明。这一学习过程让学生得以探究这一早期社会的成就与习俗如何影响现代世界的方方面面，同时培养了历史认知与批判性研究能力。

II SA Tianhe EY3 literacy | The Tiger Who Came to Tea 爱莎天河探究之旅，绘本里的奇妙对话

In EY3, our exploration of The Tiger Who Came to Tea became a rich and meaningful literacy experience that significantly supported the children's development in English. Through this familiar and engaging story, the children were immersed in language in a way that felt purposeful, exciting, and relevant to their own lives.

在中班的学习中，我们以绘本《老虎来喝下午茶》为主题，开展了内容丰富、意义深刻的英文阅读活动，有效促进了孩子们的英语能力发展。通过这个亲切又有趣的故事，孩子们自然沉浸在语言学习中，学习目标明确、过程生动有趣，内容也与他们的日常生活紧密相关。

II SA Tianhe Botanical Inquiry in Year 4 爱莎天河小小科学家养成记：四年级的植物探索之旅

In Year 4' s Biology unit, students have been working as both botanists and experts in experimental design. Their central focus: understanding plant anatomy, how plants function, and how scientists design experiments to test what they observe. The unit moved deliberately from close observation to structured inquiry, giving students the tools to think like scientists rather than simply learn facts about plants.

在四年级的生物单元学习中，同学们化身小小植物学家与实验设计小专家，围绕三大核心展开探究：认识植物构造、了解植物运作原理，以及学习科学家如何通过设计实验来验证观察结果。本单元由细致观察逐步深入到结构化探究，让学生掌握科学家思维，而非单纯记忆植物相关知识。

ISA Science City G1 Mini Market 爱莎科学城一年级营业中！“小摊主”从课堂走向市集的 IB 探究之旅

ISASC campus was buzzing with the lively chants of our young vendors. Our G1 students stepped into the shoes of "Little Shopkeepers," confidently pitching products and managing accounts at their colorful stalls. More than just a fun-filled mini-market, this event served as the grand finale of a weeks-long journey into the IB Inquiry Unit, "How We Organize Ourselves." From classroom brainstorming and field trips to collaborative discussions and the final charity sale, students explored how goods and services operate within a community through real world experience.

爱莎科学城校园里传来阵阵清脆的叫卖声。一年级孩子化身“小小摊主”，在缤纷摊位前自信推介、认真核算。这场充满欢笑的迷你市集，是孩子们历时数周，围绕 IB 探究主题“我们如何组织自己”的学习成果呈现！从课堂提问到实地探访，从讨论到公益义卖，孩子们在真实情境中理解社区商品与服务运作的奥秘。

ISA Liwan Innovation Centre 在爱莎荔湾，连走廊都“藏”着未来实验室？

On the ISA Liwan campus, "unexpected" surprises are a frequent delight. VEX robots have quietly integrated into our students' break times. Without grand opening ceremonies or deliberate emphasis, they appeared naturally in the corridors, becoming a vivid new chapter of learning beyond the classroom.

在爱莎荔湾校园里，常有一些“不期而遇”的惊喜。VEX 机器人悄然走进了学生的课间。没有隆重的启动仪式，也没有刻意的额外强调，它们就这样自然而然地出现在走廊里，成为了课堂学习之外生动的一章。

SA Tianhe Firefighters' Visit | From Pages to People 爱莎天河消防员来访 | 从书本到生活

The inquiry came vividly to life when local firefighters visited our campus. The children's excitement was palpable as they explored the fire truck, examined specialised equipment, and tried on the helmet under the guidance of these everyday heroes. Through interactive demonstrations and heartfelt conversations, the firefighters shared not only what they do, but why they do it—emphasising teamwork, courage, and commitment to service.

当消防员走进校园时，整个探究单元顿时变得生动鲜活。孩子们兴奋地探索消防车，详细了解专业装备，并在这些平凡英雄的指导下试戴了消防帽。通过互动演示和真诚的交流，消防员不仅分享了他们的工作内容，更传递了背后的信念——强调团队协作、勇气与奉献精神。

G ZFLS IBDP CAS Week 广外 IB 实践周 | 步履山河间，践行全人教育

Within the holistic education philosophy of the IB curriculum, Creativity, Activity, Service (CAS) is not merely a core component but also a pathway for personal growth. During this study week, IB students stepped beyond the classroom to undertake immersive learning in five provinces of China—Xinjiang, Yunnan, Anhui, Henan, and Sichuan. Using the landscapes as classrooms and culture as teaching materials, they applied their knowledge in diverse real-world contexts, practising the principle of "learning by doing" while gaining a profound appreciation of cultural integration and the transmission of heritage through their journeys.

在 IB 课程的全人教育理念中，创造、活动与服务 (Creativity, Activity, Service) 不仅是核心课程，更是成长路径。本次研学周，IB 学子们走出课堂，深入新疆、云南、安徽、河南、四川五省展开实地研学，以山河为课堂，以文化为教材，在真实的多元环境中践行“学以致用”，在行走中体悟文化的融合与精神的传承。

G ZFLS IBDP CSP 打破学科边界 | IB 学子以科学之力，对话 AI 新时代

The Guangzhou Foreign Language School IBDP Programme successfully held the CSP (Collaborative Science Project) Exhibition. As an interdisciplinary collaboration project tailored for the AI era, the exhibition showcased the students' achievements through diverse mediums such as videos, clay models, and artistic installations. The event vividly demonstrated their impressive capacity for independent inquiry, creativity, and hands-on skills, highlighting the multifaceted talents of IB students.

广州外国语学校 IBDP 课程成功举行了 CSP (Collaborative Science Project, 合作科学项目) 成果展。此次 CSP 成果展是 AI 时代下 IBDP 的跨学科合作项目展，展览现场，同学们通过视频、粘土模型、艺术装置等多元形式，生动展示了他们的研究成果，强大的自主探究能力、创造力与动手能力展露无遗。

I SA Science City EY4 Transition Session 教育的连贯性：爱莎科学城如何让孩子在“无感”中跨越幼小衔接？

We hosted a transition session for our EY4 families. Led by our Grade 1 Homeroom Teachers, they stepped into the primary classrooms for an engaging STEM inquiry: "How to build the most stable freestanding tower?" Following this, our Elementary Leadership shared deeper insights into the curriculum and transition support, bridging the gap between classroom practice and educational logic to empower parents with professional confidence.

我们举行了幼小衔接体验活动。在一年级主班老师的带领下，来自大班的在校家庭走进一年级课堂，进行了一节妙趣横生的 STEM 探究课：“如何搭建一座最稳固的自立塔？”随后，幼小领导团队还向家长深度解码了课程架构与衔接支持，使课堂体验转化为系统的教育逻辑，赋予家长更从容、专业的升学视角。

This summer, ISAIA SY Academic Exploration Centre and Bryant University are collaborating to launch a high school international experience summer camp. Centered on the East Coast of the United States, the camp will weave together academic exploration, cultural immersion, and practical growth. Over the course of 16 days, students will not only engage in thematic exchanges at several world-renowned universities, experiencing the distinct academic characteristics of different institutions and broadening their cognitive horizons through cultural immersion, but they will also familiarize themselves in advance with the classroom model of American universities. Maker Exploration Camp 2026 创客探索营，带你从零开始玩转科创！

This summer camp is open to primary and secondary school students and is beginner-friendly. Centred on laser cutting, 3D modelling and printing, the programme is combined with electronics programming and circuit soldering. Guided by instructors, students will start from design sketches and master the full process of digital fabrication step by step. Through hands-on learning, they will use laser cutters for engraving and cutting, design models with 3D modelling software, and bring their ideas to life with 3D printing, and then use programming and soldering to make their creations “come alive”— achieving a complete creation from structure to function. Unlike courses that focus purely on programming and algorithmic logic, this series is dedicated to a fusion of design, fabrication, and electronic interaction, allowing students to experience the joy and sense of achievement that comes from operating equipment, writing code, and soldering circuits.

本期夏令营面向中小学生开放，零基础友好。课程以激光切割与3D建模打印为核心，衔接电子编程与电路焊接技能，由老师带领学生从设计图纸起步，一步步掌握数字化造物的完整流程。在动手实践中，学生将学会用激光机切割雕刻、用3D建模软件设计模型并打印成型，再通过编程与电路焊接让作品“活”起来，实现从结构到功能的全面创造。区别于侧重纯编程与算法逻辑的课程，本系列专注于“设计+造物+电子交互”的融合体验，让学生在操作设备、编写代码、焊接电路的过程中，真切感受创造的乐趣与成就感。

For the 2026 summer vacation, ISA International Academy launches the "Five-Day Thousand-Word Summer Camp," catering to students in grades 3-6. These students, primarily concrete thinkers who enjoy gamified learning, will explore high-frequency English words through four engaging themes: biology, coffee culture, economics, and movie dubbing. With thematic scenarios as the framework and vocabulary application at its core, the course enables students to "learn through play and remember through application." This method

tackles the common struggle of memorizing words while fostering comprehensive English skills.

2026 年暑假,爱莎国际学苑结合 3-6 年级学生“具象思维为主、喜欢游戏化学习”的特点,推出“五日千词夏令营”(小学段)。课程以“主题场景为载体、单词应用为核心”,将高频英语单词融入生物、咖啡文化、经济、电影配音四大趣味主题,让学生在“玩中学、用中记”,既解决词汇积累难题,又培养英语综合运用能力。

Drone Innovation Camp 低空探索：无人机科创成长营

As the “low-altitude economy” and STEM education continue to expand globally, drone soccer is emerging as a fast-growing interdisciplinary field that blends technology and sport. With an established international competition system and strong future prospects, it is increasingly adopted by schools as part of innovation programs and holistic education. Unlike traditional sports, drone soccer integrates engineering thinking, spatial awareness, rapid decision-making, and teamwork. It is one of the few activities that simultaneously develops both analytical reasoning and competitive performance, making it especially valuable in a future-oriented learning environment.

在“低空经济”与STEM教育快速发展的当下，无人机足球正成为全球范围内迅速崛起，成为科技与体育融合新赛道。该项目不仅具备完善的赛事体系与国际发展前景，更被越来越多学校纳入科创教育与综合素养培养的重要模块。相较于传统体育项目，无人机足球融合了工程思维、空间感知、即时决策与团队协作，是少数能够同时提升“理性思维”和“竞技能力”的复合型项目。

I SA ART | G9-G11 Visual Arts Semester Exhibition 探索之境 | G9-G11 视觉艺术学期成果展

On 30 January, the G9-G11 Visual Arts Semester Exhibition opened at ISA Liwan School, transforming the Level 5 public area of Building B into a Realm of Exploration. More than a presentation of termly outcomes, the exhibition became a thoughtful dialogue around artistic exploration, sincere expression, and future growth. Through guided tours, featured talks, and face-to-face conversations, parents were able to closely observe students' development — from perceiving the world and understanding themselves to completing fully realised creative works — while gaining a clearer picture of how artistic learning evolves across different stages of study.

1月30日，荔湾爱莎学校B栋5楼公共空间化作一片充满创意与思考的「探索之境」，G9-G11视觉艺术学期成果展于此温情启幕。这不仅是一场阶段性学习成果的集中呈现，更是一场围绕艺术探索、真诚表达与未来成长展开的深度对话。在导赏参观、主题分享与面对面交流中，家长们近距离见证了孩子们从感知世界、理解自我，到完成完整创作表达的成长蜕变，也更清晰地看见了艺术学习在不同学段中的发展路径。

This year, AI accelerates—while we hesitate. In a second, it generates what took us a week to sketch. In ten seconds, it writes what we struggled over all night. Some say artists and designers will be replaced. We listened for a moment—then turned back to our easels, our clay, our screens, and continued. Not because we are unafraid, but because we are holding onto a thread AI does not have.

这一年，AI 在加速，我们在卡壳。它貌似一秒就能生成我们画了一周的草图，十秒可以写出我们憋了一晚的创作描述。有人说，未来艺术设计职业会被取代。那些声音飘在空气里，我们听了一会儿，然后转身回到画架前、泥堆里、屏幕上继续我们的创作——心里并非没有迷茫，但我们也深知自己手里攥着一些 AI 没有的线。

The Guangzhou Foreign Language School IBDP Programme Visual Arts Exhibition was launched at the International Exchange Centre, inviting audiences into a boundless world of creativity. Stepping into the exhibition space, visitors are immediately enveloped by a rich artistic atmosphere. As an integral part of the IBDP curriculum, the Visual Arts Exhibition is also included in the IB final assessment. For Year 12 students, this marks a pivotal moment as they present their finest artworks, showcasing the technical skills and artistic proficiency they have developed over their two-year Visual Arts course.

广州外国语学校 IBDP 课程视觉艺术展在国际交流中心拉开帷幕，邀请观众走进一个创意无界的世界。走进展览现场，浓郁的艺术氛围扑面而来。作为 IBDP 课程的一部分，视觉艺术展览是 IB 大考评估内容之一。对于 12 年级的学生来说这是至关重要的时刻，他们需要展示自己最好的艺术作品，展示他们在两年视觉艺术课程中所发展的技术熟练度。

爱莎公益 | 践行 IB 服务精神，让爱与尊重跨越视觉边界

When the clear voices of first graders met the warm explanations of older students, a dialogue about “seeing” unfolded at Wuhan School for the Blind. ISA Charity and Wuhan No. 2 High School IB Class came with the intention of “using my eyes to show you the world,” guided by IB’s principle of “service and action.” They helped visually impaired children experience colors through technology and learned equality through companionship—allowing love and respect to cross visual boundaries and illuminate every unique life.

当一年级的清脆的童声与哥哥姐姐们温暖的讲解交织成韵，武汉市盲童学校的教室里，正发生着一场关于“看见”的深刻对话。爱莎公益与武汉二中 IB 班同学们一起，带着“用我的眼睛带你去看世界”的初心而来，以 IB 课程倡导的“服务与行动”为指引，完成了一次超越课堂的成长实践——让视障孩子通过科技触摸色彩，让少年们在陪伴中理解平等，让爱与尊重跨越视觉的边界，照见每个生命的独特光芒。

We witnessed moving moments where fierce competition went hand in hand with true friendship—opponents helping each other up after a tackle, mutual respect after a goal, and genuine admiration at the final whistle. Using football as a bridge to connect friends from across the world—that is the enduring spirit of the ISA Consulate Cup.

3月21日,广州春雨淅淅沥沥,却浇不灭绿茵场上的热血与激情!2026爱莎“领馆杯”足球赛收官战在爱莎科学城学校燃情上演,雨幕中的拼抢、泥泞里的奔跑,让这场跨国界的足球盛宴更具热血底色。这一天,我们见证了友谊与竞争并存的动人画面——拼抢后的伸手相扶、进球后的相互致意、终场哨响时的惺惺相惜都诠释着竞技体育的美好。以足球为媒,联结世界友人,这正是爱莎“领馆杯”始终坚守的初心。
